

Before Classes: Teacher Preparation Checklist

Objective: Ensure the classroom is fully prepared before students enter.

- **Review the Lesson Plan (A Week Prior & Start of Week)**
Revisit the lesson objectives, activities, and assessment checkpoints before the class begins.
- **Check Inventory & Materials (A Week Prior & Start of Week)**
Verify that all equipment and materials required for the lesson are available and in working condition (this is best done at the beginning of the week/day.)
- **Inspect Classroom Equipment (Start of Week & Start of Day)**
Check the projector, teacher computer, internet connection, speakers, and any peripherals to ensure everything is functioning properly.
- **Open the Lesson Presentation**
Display the correct lesson slide/PPT on the teacher's computer and projector before students arrive or while they are entering the class.
- **Make sure all computers have no tabs open**
Ensure all student computers remain unused until explicitly allowed by the teacher.

Beginning of the Class

Objective: Set clear expectations, engage students, and establish a focused learning environment.

- **Slides open on either first slide or objectives slide**
Never start the class with no slides on the screen. Slides & Greeting are CUES for students.
- **Students Entering**
Students must enter group by group, they are not allowed to start speaking or use the computers, and they must be reminded group by group as they enter with long eye contact if not done. Their CONSISTENT BEHAVIOUR REMINDER MUST BE:
 1. Enter Group by Group
 2. No Speaking
 3. No Touching of Computer
 4. No Touching of Boxes/Materials
- **Ensure Students Are Seated Properly**
While students are entering group by group, make sure they are being settled in their chairs.
- **Welcome Students**
Once all students are settled (make sure that every student is settled before you greet, as greeting will be the CUE for starting the lesson), Greet them by a long elongation of “Goooooodmorning/afternoon class”. Students must build a habit of this greeting being a CUE to completely focus on the lesson.
- **Updates/Reminder**
It is only this time where you can get updates from students regarding any matters as well as remind them of any important information. Never update/remind in the middle of the lesson.
- **Objectives**
First thing to do before starting the lesson is share the objectives while having the missions slide open.

During the Class

Objective: Deliver the lesson effectively while keeping all students engaged and on task.

- **Allow Computer Use Only When Instructed**
Students must never open the computers without being instructed. If some students require the use of computers, then they can only do this from being explicitly allowed.
- **Never continue class while there is speaking**
If a class is disturbed, never continue the lesson. Order must be restored before you continue. Multiple interruptions between explanations can result in poor understanding and lack of attention even from interested students.
- **Monitor All Groups**
Move around the classroom regularly while explaining, and make sure your eyes keep looking at group by group.
- **Start of misbehaviour**
When only one or few groups are starting to misbehave, they must be called out before it continues to other groups. They must be addressed directly with long silence until they are quiet. Otherwise, they will be asked to stand up in their seats so the assistant is able to spot them directly. If they continue misbehaving, they will be separated from their group.
- **Full Loss of Attention**
If the class becomes noisy, use the agreed attention grabber ("**Class, Class!**" > "**Yes, Yes!**") and wait for complete silence before continuing. Class can be used with a physical move but the purpose is for them to mimic you. So you can say Class while raising one hand then another Class while putting your hand down. If students at the start do not do this, you walk around and say Claass while looking every group in the eyes to spot the groups who are not following the instructions.
- **Hooks & Check for Understanding Pauses**
Pause during the lesson to ask questions and confirm that students understand before moving ahead. Pauses are extremely important and let students absorb information on the slide as well as ponder on the questions.
- **Manage Lesson Pace**
Keep track of time to ensure all planned activities are completed within the class period. Proper time must be given to activity, and no extra time is to be spent on slides more that what is mentioned in the teacher document.
- **Student Questions**
Take all the students' queries that are unrelated to the lesson at the end of class and never at the start or during. Address them immediately OR write their names down in order for you to address them at the end of the day or at the proper time.
- **Observe and Document Student Progress**
Monitor students throughout the classroom, inform assistants to write the names of students who stand out and of any negative or positive events.

Transitions Between Concepts & Activity

Objective: Ensure smooth movement between lesson activities without losing student attention or instructional time.

- **Gain Everyone's Attention First**
- Use the class attention signal before giving any new instructions, especially during activities. Use Transition Dialogue after explaining each concept.
- **Check That Everyone Is Listening:**
Wait until all students are quiet and look at the teacher before continuing. Do not explain while students are distracted.
- **Confirm Readiness Before Moving On**
Check that more than half the class has finished the task before starting the next activity, especially during activity time. Use timers to ensure that everyone is on track. Timers must be used to engage students properly.

End of Class

Objective: Restore the classroom, record important information, and prepare for the next lesson.

- **Dismiss on Time**

Dismiss students on time. Make sure you are aware of the time in order to remind students to finish their tasks and close the computers PRIOR to the bell.

- **Dismiss Students Group-wise**

Dismiss one section at a time instead of allowing the entire class to leave together. Ensure the first section exits calmly before instructing the next section to leave. This helps prevent overcrowding, reduces noise, and ensures a safe and orderly exit.

Their CONSISTENT BEHAVIOUR REMINDER MUST BE:

1. Sign Out
2. Close All Tabs
3. Put Back all Materials
4. Stay in Seat Until Your Group Turn Comes

- **Prepare for the Next Class**

Open the correct slides for the next class before doing anything else. If students want to ask you questions, they can ask while you are opening the slide or let them wait while you open it first.
